Meetings in Greece and Serbia

Presentation of the VR4Clima project at the Regional Robotics Contest of Central Greece

The Project and especially the 3d Game were presented by the associated partner Regional Directorate of Education of Central Greece to teachers, students and parents during the Regional Robotics Competition held in Lamia at 15/03/25. The students and parents were very enthusiastic while many school Leaders across the Region asked for a presentation of the game in their schools. Such presentations will take place in September 2025.

2nd TPM

The project partners had the chance to meet in person, discuss and coordinate the rest of the project. The launch of the EU School Contest was organised thoroughly and the VR Course was presented in the form of a workshop.

According to the interim evaluation from the Greek NA, the progress of the project is satisfying and the results so far are of good quality

Meet our VR4Clima Representative from Center for the Promotion of Science, Serbia
